For: METHODS FOR PLANARIZATION OF GROUP VII METAL-CONTAINING SURFACES USING
OXIDIZING GASES

Amendments to the Claims

This listing of claims replaces all prior versions, and listings, of claims in the above-identified application:

Listing of Claims

1. **(Currently Amended)** A planarization method comprising:
 positioning a Group VIII metal-containing surface of a substrate to interface with a polishing surface, wherein the Group VIII metal is selected from the group consisting of rhodium, iridium, ruthenium, osmium, palladium, platinum, and combinations thereof;
 supplying ~~[[a]]~~an acidic planarization composition in proximity to the interface;
 ~~[[adding]]~~feeding an oxidizing ~~[[agent-to]]~~gas into the planarization composition in the form of a gas; and
 planarizing the Group VIII metal-containing surface;
 wherein the oxidizing gas has a standard reduction potential of at least about 1.4 versus a standard hydrogen electrode at 25°C.
2. **(Original)** The method of claim 1 wherein the Group VIII metal-containing surface of the substrate comprises a Group VIII metal in elemental form or an alloy thereof.
3. **(Original)** The method of claim 2 wherein the Group VIII metal-containing surface comprises elemental platinum, rhodium, iridium, ruthenium, or a combination thereof.
4. **(Original)** The method of claim 3 wherein the Group VIII metal-containing surface comprises elemental platinum.

Amendment and Response - Under 37 C.F.R. §1.116 - Expedited Examining Procedure Page 3 of 10
Serial No.: 10/032,357
Confirmation No.: 4965
Filed: December 21, 2001
For: METHODS FOR PLANARIZATION OF GROUP VII METAL-CONTAINING SURFACES USING
OXIDIZING GASES

5. (Original) The method of claim 1 wherein the Group VIII metal is present in an amount of about 10 atomic percent or more.
6. (Original) The method of claim 1 wherein the substrate is a semiconductor substrate or substrate assembly.
7. (Original) The method of claim 1 wherein the polishing surface comprises a polishing pad and the planarization composition comprises a plurality of abrasive particles.
8. (Original) The method of claim 1 wherein the planarization composition comprises a plurality of abrasive particles having a hardness of no greater than about 9 Mohs.
9. (Original) The method of claim 8 wherein the plurality of abrasive particles comprise CeO_2 , Al_2O_3 , SiO_2 , and mixtures thereof.
10. (Original) The method of claim 1 which is carried out in one step.
11. (Original) The method of claim 1 wherein the oxidizing gas is selected from the group consisting of oxygen, ozone, air, chlorine, nitrous oxide, nitric oxide, sulfur trioxide, an interhalogen, and combinations thereof.
12. (Original) The method of claim 11 wherein the oxidizing gas is selected from the group consisting of oxygen, air, and combinations thereof.
13. (Original) The method of claim 12 wherein the oxidizing gas is oxygen.

Amendment and Response - Under 37 C.F.R. §1.116 - Expedited Examining Procedure Page 4 of 10
Serial No.: 10/032,357
Confirmation No.: 4965
Filed: December 21, 2001
For: METHODS FOR PLANARIZATION OF GROUP VII METAL-CONTAINING SURFACES USING
OXIDIZING GASES

14. (Original) The method of claim 1 wherein planarizing is carried out using a fixed abrasive article.
15. (Currently Amended) A planarization method comprising:
positioning a Group VIII metal-containing surface of a substrate to interface with a polishing surface, wherein the Group VIII metal is selected from the group consisting of rhodium, iridium, ruthenium, osmium, palladium, platinum, and combinations thereof;
supplying ~~[[a]]an acidic~~ planarization composition in proximity to the interface;
feeding an oxidizing gas into the planarization composition;
and
planarizing the Group VIII metal-containing surface;
wherein the planarization composition comprises an oxidizing gas ~~is~~ selected from the group consisting of oxygen, air, chlorine, nitrous oxide, nitric oxide, sulfur trioxide, an interhalogen, and combinations thereof;
wherein the polishing surface comprises a fixed abrasive article or a polishing pad; and
wherein when the polishing surface comprises ~~[[a]]the~~ polishing pad the planarization composition comprises a plurality of abrasive particles having a hardness of no greater than 9 Mohs.
16. (Currently Amended) A planarization method comprising:
positioning a Group VIII metal-containing surface of a substrate to interface with a polishing surface, wherein the Group VIII metal is selected from the group consisting of rhodium, iridium, ruthenium, osmium, palladium, platinum, and combinations thereof;
supplying ~~[[a]]an acidic~~ planarization composition in proximity to the interface;
~~[[adding]]~~feeding an oxidizing ~~[[agent to]]~~gas into the planarization composition in the form of a gas;

Amendment and Response - Under 37 C.F.R. §1.116 - Expedited Examining Procedure Page 5 of 10
Serial No.: 10/032,357
Confirmation No.: 4965
Filed: December 21, 2001
For: METHODS FOR PLANARIZATION OF GROUP VII METAL-CONTAINING SURFACES USING
OXIDIZING GASES

and

planarizing the Group VIII metal-containing surface;

wherein the oxidizing gas has a standard reduction potential of at least about 1.4 versus a standard hydrogen electrode at 25°C, wherein the oxidizing gas is ~~[[added in]]~~fed into the composition in an amount of no greater than about 10% by weight.

17. **(Currently Amended)** A planarization method comprising:

providing a semiconductor substrate or substrate assembly including at least one region of a platinum-containing surface;

providing a polishing surface;

providing ~~[[a]]~~an acidic planarization composition at an interface between the at least one region of platinum-containing surface and the polishing surface; and

~~[[adding]]~~feeding an oxidizing [[agent to]]gas into the planarization composition ~~in the form of a gas;~~

planarizing the at least one region of platinum-containing surface;

wherein the oxidizing gas has a standard reduction potential of at least about 1.4 versus a standard hydrogen electrode at 25°C.

18. **(Original)** The method of claim 17 wherein the platinum is present in an amount of about 10 atomic percent or more.

19. **(Original)** The method of claim 17 wherein the platinum-containing surface comprises elemental platinum.

20. **(Original)** The method of claim 17 wherein the planarization composition comprises a plurality of abrasive particles selected from the group consisting of CeO₂, Al₂O₃, SiO₂, and mixtures thereof.

Amendment and Response - Under 37 C.F.R. §1.116 - Expedited Examining Procedure Page 6 of 10

Serial No.: 10/032,357

Confirmation No.: 4965

Filed: December 21, 2001

For: METHODS FOR PLANARIZATION OF GROUP VII METAL-CONTAINING SURFACES USING
OXIDIZING GASES

21. **(Original)** The method of claim 17 wherein the platinum-containing surface comprises a platinum alloy.
22. **(Original)** The method of claim 17 wherein the semiconductor substrate or substrate assembly is a silicon wafer.
23. **(Original)** The method of claim 17 wherein the oxidizing gas is selected from the group consisting of oxygen, nitrous oxide, air, or combinations thereof.
24. **(Original)** The method of claim 23 wherein the oxidizing gas is selected from the group consisting of oxygen, air, or combinations thereof.
25. **(Original)** The method of claim 24 wherein the oxidizing gas is selected from the group consisting of oxygen.
26. **(Currently Amended)** A planarization method for use in forming a capacitor or barrier layer:
 - providing a wafer having a patterned dielectric layer formed thereon and a Group VIII metal-containing layer formed over the patterned dielectric layer, wherein the Group VIII metal is selected from the group consisting of rhodium, iridium, ruthenium, osmium, palladium, platinum, and combinations thereof;
 - positioning a first portion of a polishing surface for contact with the Group VIII metal-containing layer;
 - adding an oxidizing agent to the planarization composition in the form of a gas;
 - providing ~~[[a]]~~an acidic planarization composition in proximity to the contact between the polishing surface and the Group VIII metal-containing layer;

Amendment and Response - Under 37 C.F.R. §1.116 - Expedited Examining Procedure Page 7 of 10

Serial No.: 10/032,357

Confirmation No.: 4965

For: METHODS FOR PLANARIZATION OF GROUP VII METAL-CONTAINING SURFACES USING
OXIDIZING GASES

feeding an oxidizing gas into the planarization composition;

and

planarizing the Group VIII metal-containing layer;

wherein the oxidizing gas has a standard reduction potential of at least about 1.4
versus a standard hydrogen electrode at 25°C.

27. (Currently Amended) The method of claim 16 wherein the polishing surface comprises
a fixed abrasive article or a polishing pad; and

wherein when the polishing surface comprises ~~[[a]]~~the polishing pad the
planarization composition comprises a plurality of abrasive particles having a hardness of no
greater than 9 Mohs.

28. (Currently Amended) The method of claim 17 wherein the polishing surface comprises
a fixed abrasive article or a polishing pad; and

wherein when the polishing surface comprises ~~[[a]]~~the polishing pad the
planarization composition comprises a plurality of abrasive particles having a hardness of no
greater than 9 Mohs.

29. (Currently Amended) The method of claim 26 wherein the polishing surface comprises
a fixed abrasive article or a polishing pad; and

wherein when the polishing surface comprises ~~[[a]]~~the polishing pad the
planarization composition comprises a plurality of abrasive particles having a hardness of no
greater than 9 Mohs.
